Ambition breeds motivation.

I am an ambitious and motivated web developer who has achieved significant success in the field of IT and programming since the beginning of 2023. Despite the lack of formal education in this area, my determination and ability to learn quickly allowed me to master everything necessary for full stack developers in the "Kodehode" course. I want to develop in this area and achieve my goals, all I need is to gain experience in the best places where I can learn new technologies and develop further.

Personal Qualities

I am driven by a strong desire for continuous growth and thrive in challenging environments. My key strengths include adaptability, goal-oriented mindset, and a sense of responsibility.

Be with the best

I am seeking an opportunity to contribute my skills and enthusiasm to a dynamic web development team. Despite my unconventional path, I am confident in my ability to make meaningful contributions to innovative and modern web applications.
